Precious Metals-Rich VMS Exploration in Southeast Alaska

TSX-V: **ALX**

Why VMS, Why SE Alaska

Globally significant VMS deposits for grade & scale

- Greens Creek: standout VMS for gold and silver
- Windy Craggy: one of largest VMS globally

Alex sees SE Alaska as a surprisingly underexplored region despite its support for mining, good access and infrastructure, and high discovery potential.

Wodski Project

- Greens Creek-style mineralization over thick intervals
- Grab samples include Gold **up to 10 g/t** alongside Ag, Zn, Pb

KSO Project

- 6 VMS lenses at one old mine
- Surface mineralization & alteration at new target
- Multiple historic VMS occurrences in area

Frenchie Project

- 2nd Greens Creek look-alike with thick bed of VMS exposed for 180m along a creek cut.

Putting CEDS Objectives into Action with Natural Resources

- Obj 04** **Attract Capital & Maintain Global Competitiveness**
- Position SE Alaska as a safe, stable destination for mineral and energy investment.
 - Highlight world-class resources and an investment-friendly environment to attract domestic and international capital.

- Obj 06** **Advocate for Effective Regulation**
- Support efficient permitting and responsible resource development.
 - Build on Alex Metals' collaborative first year with the USFS to advance shared goals.

- Obj 07** **Advance Access on State & Federal Lands**
- Pursue durable access policies for state and federal lands.
 - Pair resource access with responsible development and community benefit.

- Obj 08** **Modernize the Tongass Land Management Plan**
- Support needed development while ensuring the plan responds to industry needs.
 - Advance partnerships and responsible development that supports a prosperous, sustainable future for generations to come.
